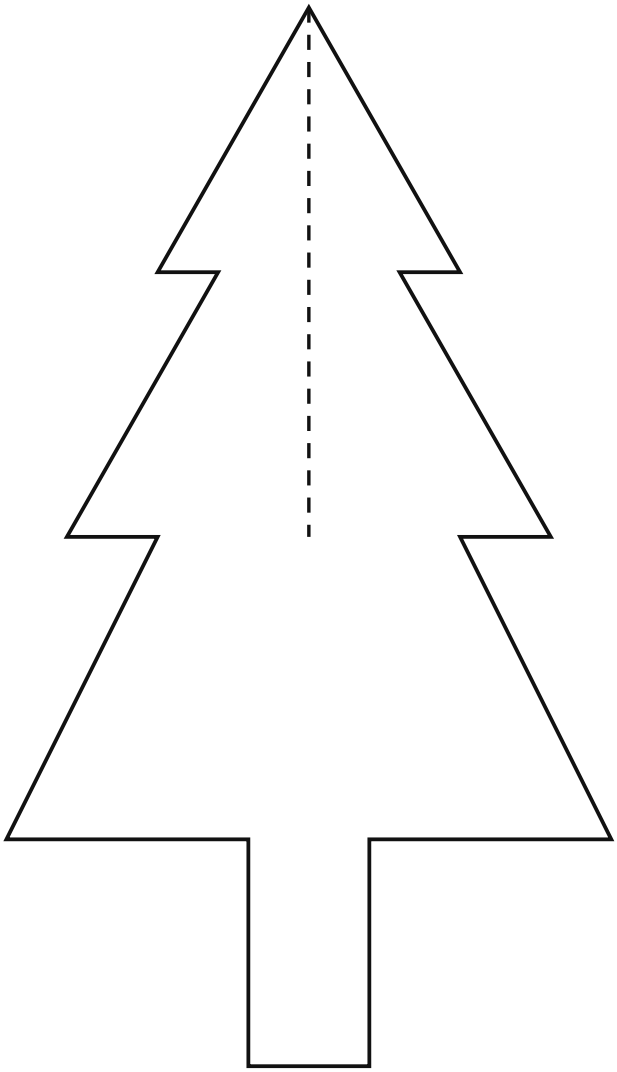
Make a standing Christmas tree

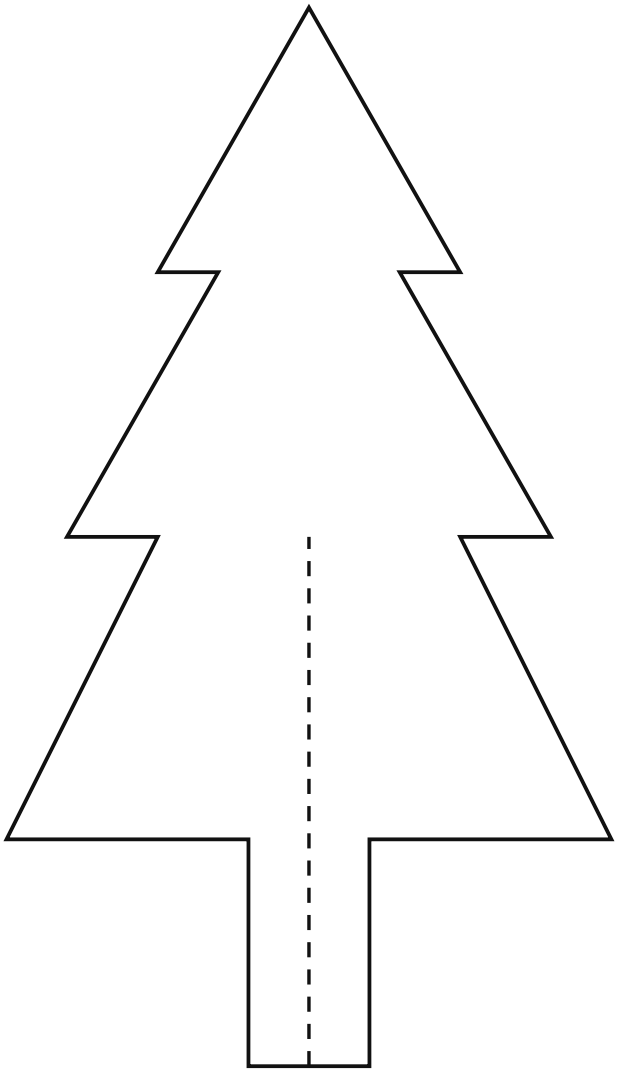
Two matching pieces. Colour, cut and slot together.

A4 • print at 100% / actual size • each tree is 14 cm tall

A: slot from the top



B: slot from the bottom



1. Use card, or glue these paper trees to thin packaging card.

2. Cut the solid outlines. Cut each dashed slot to the middle.

3. Turn one tree sideways and slide the two slots together.

An adult can widen the slots to fit the card thickness.

The two trunks should meet the table at the same height.
