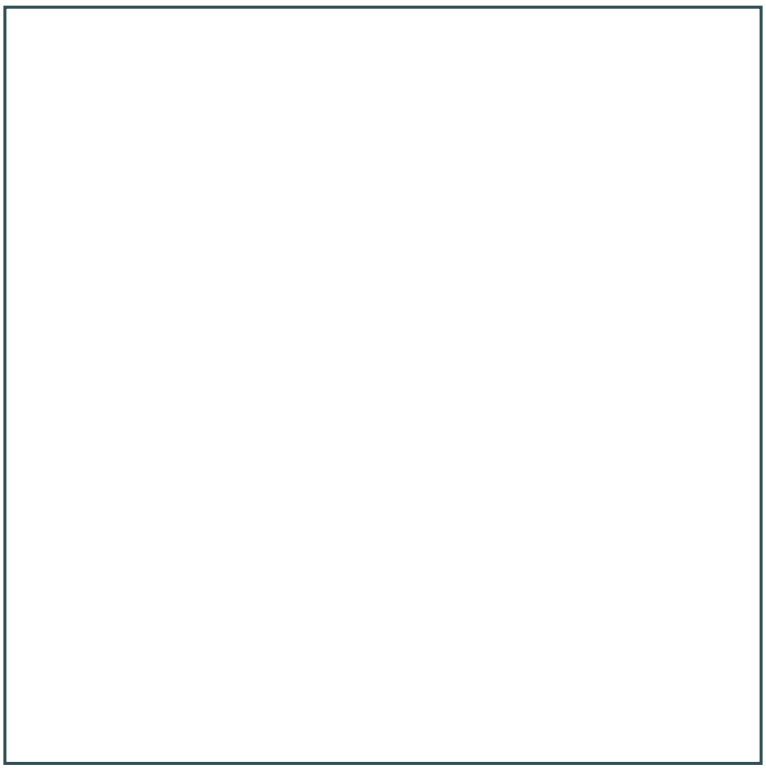
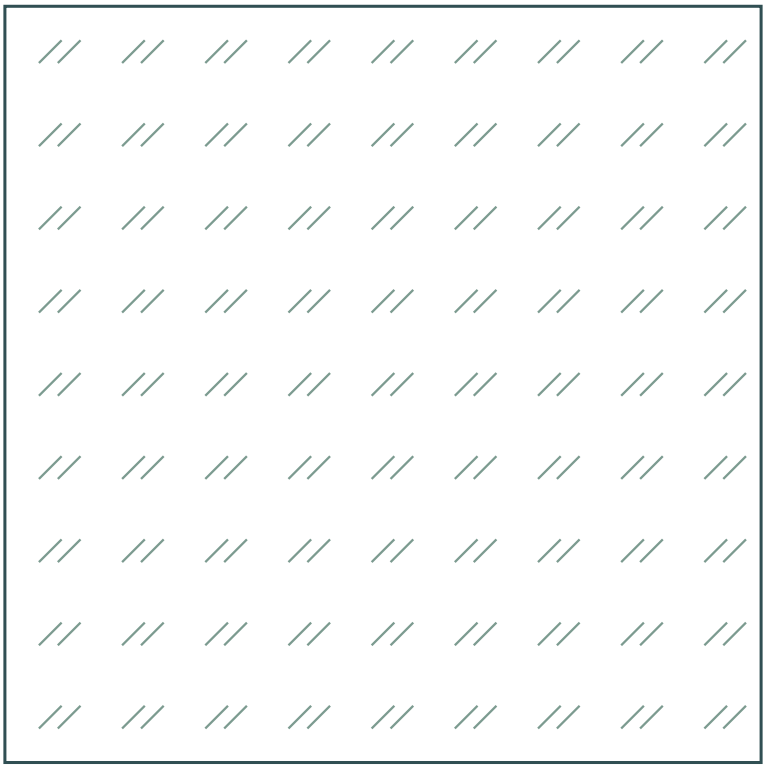
Corner bookmark squares

Cut one 100 mm square. Fold with the printed or decorated side down.

Plain · add your own drawing



Pattern · reverse stays blank

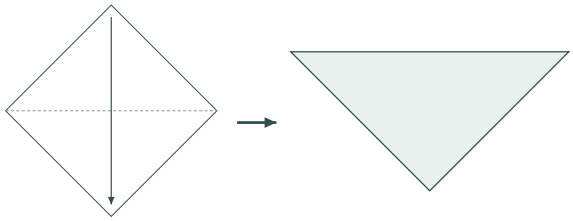


This line should measure 50 mm at 100%.

Make the creases

Shaded = printed / drawn side. White = reverse. Keep the same orientation.

1. Top corner down



Printed side down Printed side up

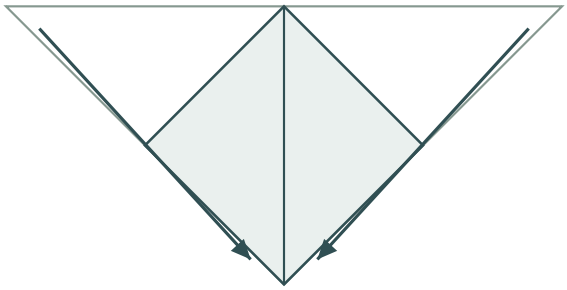
Cut one square. Decorate the plain one first, if wanted.

Printed side DOWN: turn it into a diamond.

Bring the top corner down to the bottom corner.

Keep the long edge at the top and the point below.

2. Both corners down

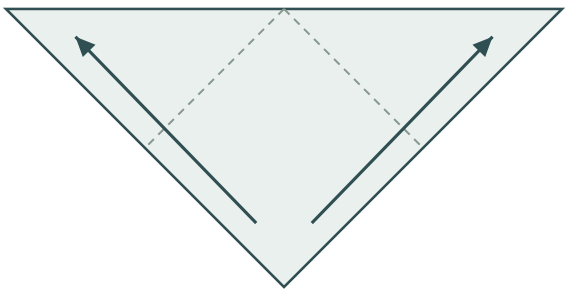


Bring the left corner down to the bottom tip.

Press the crease, then do the same with the right.

Both outside corners fold with both paper layers.

3. Open both corners



Open both outside corners again.

Keep the two diagonal creases you just made.

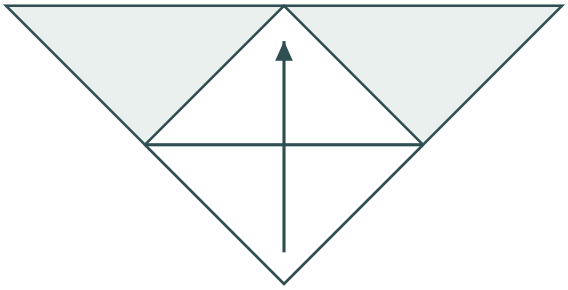
You have a triangle with its point toward you.

This line should measure 50 mm at 100%.

Fold the pocket and tuck

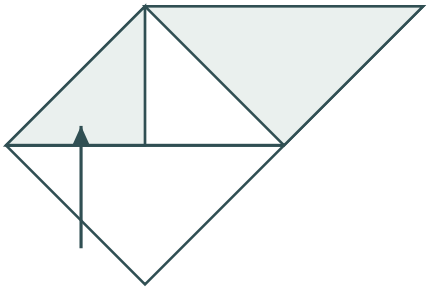
Shaded = printed / drawn side. White = reverse. Keep the same orientation.

4. Front tip up



Lift only the FRONT bottom tip to the middle of the long top edge. Press this horizontal fold. Leave the back-layer bottom tip where it is.

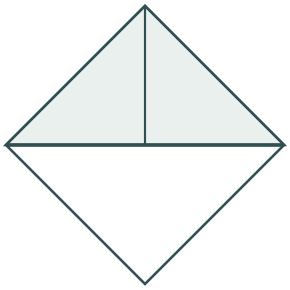
5. Tuck the left tip



Fold the left corner down along its earlier crease. Lift its loose tip and tuck it inside the pocket, behind the front flap. Press it flat gently.

Tuck shown schematically

6. Tuck the right tip



Fold the right corner down; tuck its tip inside too. The finished front view is shown on the left. Open the pocket along the middle edge and slide it over a single page corner. Do not force it.

Tuck shown schematically

This line should measure 50 mm at 100%.
