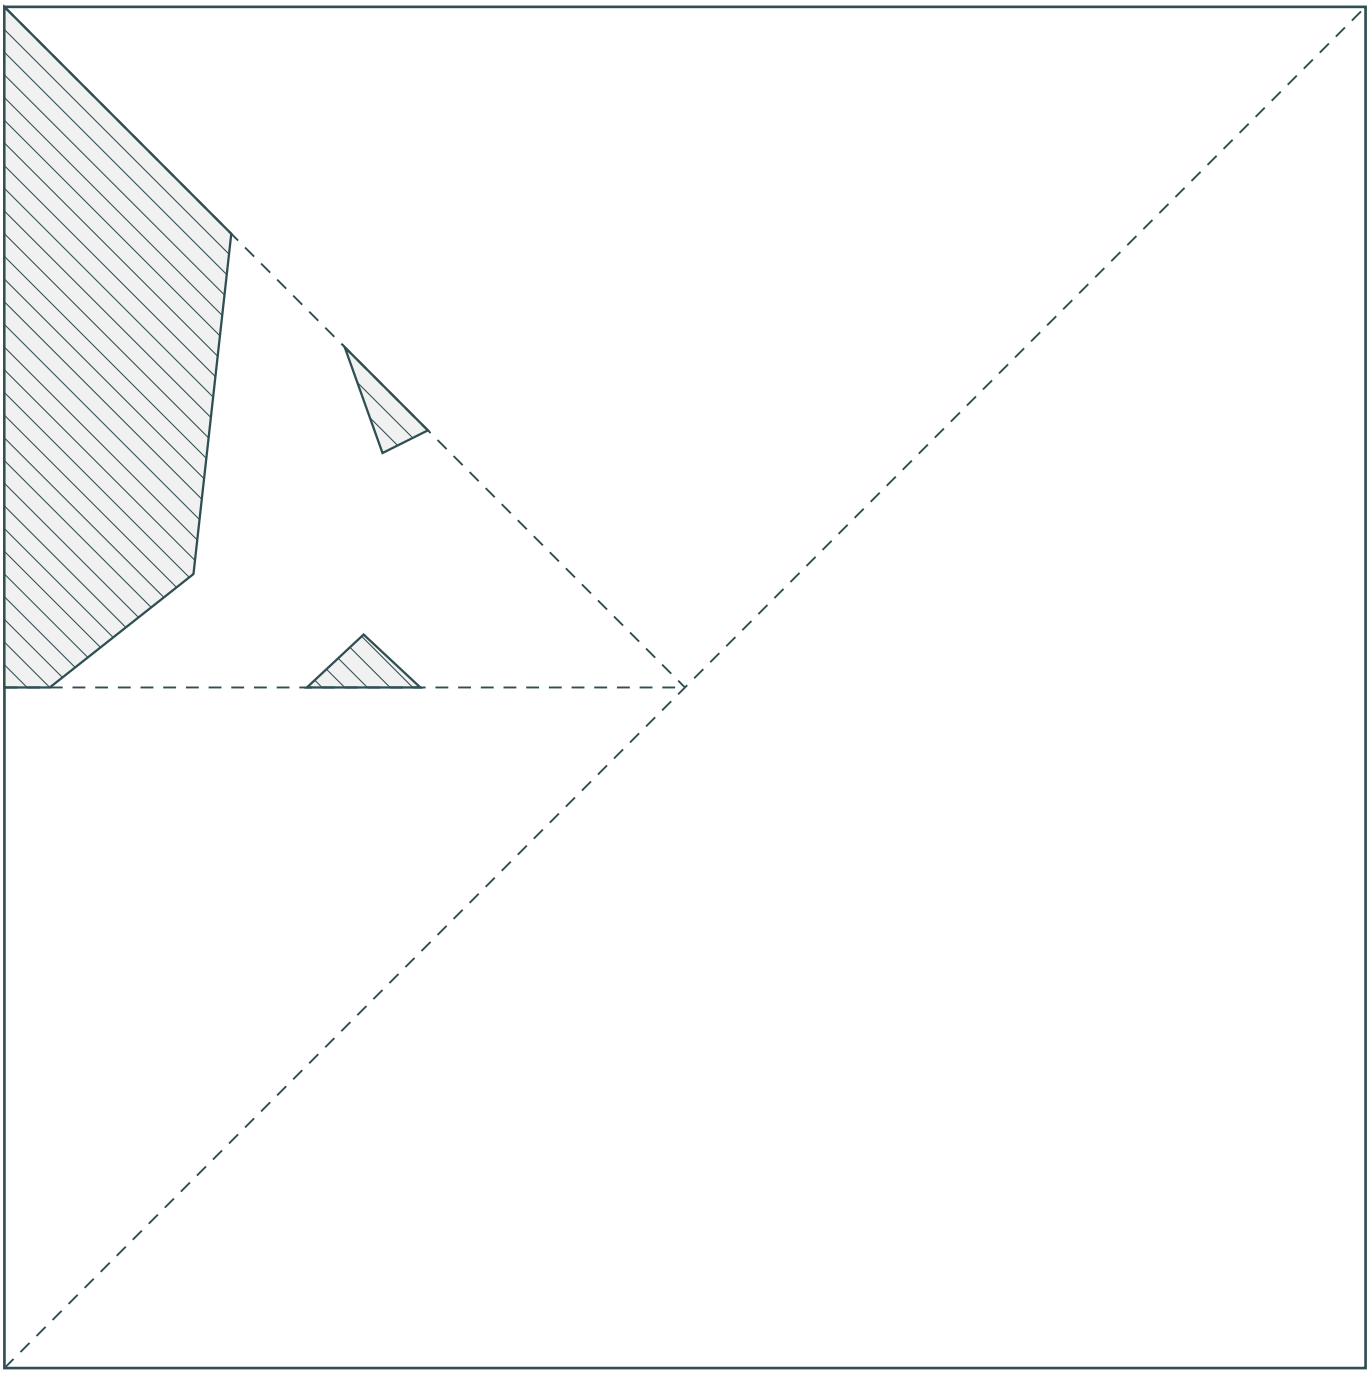
1. Star windows

180 × 180 mm square · print A4 at 100%

Cut out the square, then follow the three folds on page 3.

Start printed side down. Cut shaded areas only after folding.

TOP



Solid outside line: cut out the square first.

Dashed lines: folds. Shaded parts: cut away after folding.

Keep the centre joined. Unfold gently; turn over for the plain side.

Print size check

This line should measure 50 mm.

2. Branching star

180 × 180 mm square · print A4 at 100%

Cut out the square, then follow the three folds on page 3.

Start printed side down. Cut shaded areas only after folding.

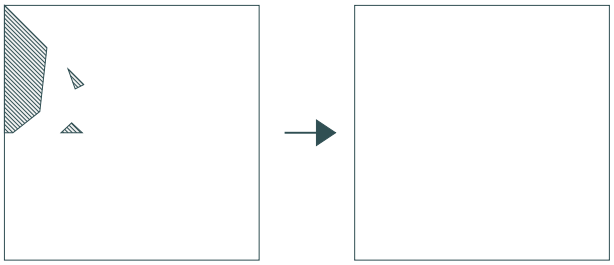
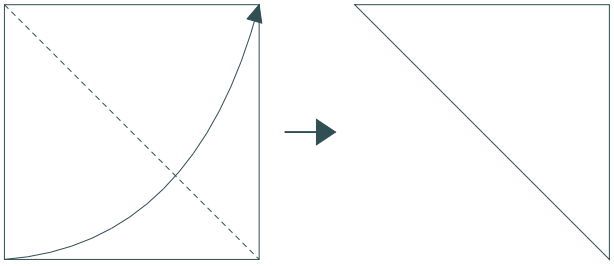
Your folding and cutting guide

Use with either cutting square. Pictures show before and after each step.



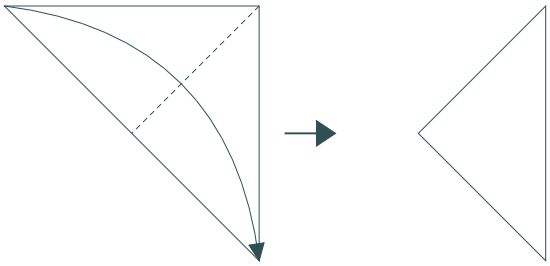
1. Cut and turn over

Cut out one square. Turn it over sideways, keeping its top edge at the top. Start with the printed side down.



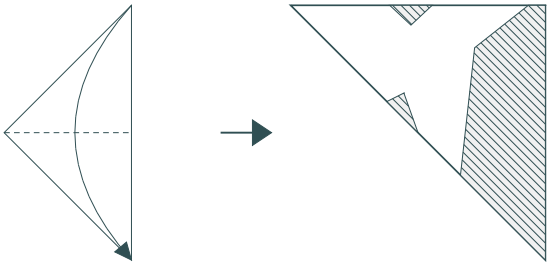
2. First fold: corner to corner

Bring the bottom-left corner up to the top-right corner. Match the edges and crease the long diagonal.



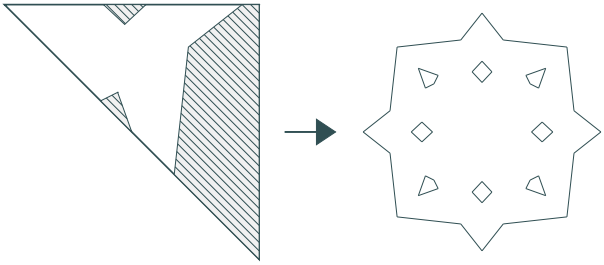
3. Fold the large triangle

Bring its top-left corner to the bottom-right corner. Crease from the top-right corner to the middle of the square.



4. Make the narrow wedge

Bring the upper point down to the lower point. Keep the middle of the original square at the left. The shaded pattern is on top.



5. Cut, then open

An adult can help cut the folded stack. Cut away the shaded areas, leaving the unshaded paper joined at the left point. Open gently.

Print size check

This line should measure 50 mm.
